03 · OPERATE · VIRTUALISATION

We build the right platform strategy in response to rising VMware costs.

Installation, operation and cross-platform migration across VMware, Nutanix and open-source OLVM/KVM environments; we reduce licensing costs while preserving high availability.

THE PROBLEM WE SOLVE

Your VMware licence renewal is putting unexpected pressure on your budget.

You want to move to an alternative platform but are wary of the risk of downtime.

HA and DR setups exist on paper but have never been tested.

SCOPE OF SERVICES

VMware
Installation, management and version upgrades of vSphere environments.

Nutanix
Installation and operation of hyperconverged infrastructure.

OLVM / KVM
Significant savings on licensing costs with open-source virtualisation.

V2V migrations
Cross-platform virtual machine migration with minimised downtime.

Licence optimisation
Alternative platform strategies in response to rising VMware costs.

High availability
Uninterrupted service with HA/DRS setups and disaster recovery scenarios.

TECHNOLOGIES

VMware · Nutanix · OLVM / KVM · V2V · HA / DRS

QUICK START

Package	Duration	Deliverables
VMware Exit Analysis	10 business days	Cost comparison and wave plan

Free discovery call

We spend 45 minutes understanding your environment and priorities. Free of charge.

Virtualisation

FROM SERVER TO DESKTOP

Server Virtualisation
Splitting one physical server into multiple virtual servers to use hardware efficiently.

Desktop Virtualisation (VDI)
Operating system and applications run on a central server, with secure access from any device.

Application Virtualisation
Decoupling the application's runtime environment from the physical computer for more secure and manageable deployment.

Network Virtualisation
A flexible and scalable structure through software-based management of network resources.

Data centre virtualisation
Integrated management of server, storage and network resources in a virtual environment.

Proxmox VE and Hyper-V
In addition to VMware, Nutanix and OLVM/KVM, we operate Proxmox VE and Hyper-V environments.

SOLUTION DETAILS

Infrastructure, Network and Data Centre Management	Operation of the foundation layer, from servers and hypervisors to network devices, from rack layout to cooling.
